Education

B.E | Theem college of Engineering (Mumbai University)

CGPA: 8.89/10

2019 - 2023

Experience

Software Engineer | Motilal Oswal Asset Management Company:

[Mar 2025 - Present]

- Worked on a fintech investment application handling **Mutual Fund transactions**.
- Implemented core investment functionalities including: SIP, Lumpsum, SWP, STP, Switch, and Redemption.
- Developed cart-based transaction flow for multiple investment orders.
- Integrated payment gateways: Razorpay and BillDesk
- Built a scalable and high-performance React frontend with reusable, responsive UI components based on Figma designs, using Material UI (MUI), Redux Toolkit for state management, and React Query for efficient server state, caching, and API synchronization, with a strong focus on clean architecture and user experience.

Associate Software Consultant | Muraai Information Technology

[Jul 2023 - Mar 2025]

- **Enhanced Product Efficiency:** Spearheaded frontend development for the company's core product, SIMS, leveraging React.js and Redux to craft highly intuitive and dynamic user interfaces, significantly improving user efficiency by 25%.
- **Full Stack Development:** Designed, developed, and successfully deployed end-to-end features for diverse client projects and internal tools using the MERN stack, ensuring robust scalability and consistently exceptional performance.
- **Client-Centric Development:** Collaborated closely with clients to gather and analyze comprehensive requirements, resolve tickets efficiently, and develop tailored solutions to enhance satisfaction, retention rates, and user experience.

Projects

Freelance Project – Gym Management Mobile Application

Developed a Gym Management mobile application using React Native with a smooth, responsive UI, backed by an Express.js and MongoDB backend featuring APIs for member and membership management, data persistence, and scalable architecture, with backend services deployed on Render.

Chat Application (Live Demo: <https://roaring-banoffee-4a4a09.netlify.app>) :

A real-time chat application built using the MERN stack, equipped with advanced functionalities like instant messaging powered by Socket.IO. The application ensures secure user sessions with JWT authentication and features infinite scrolling for effortless navigation through chat history. A dynamic light/dark mode toggle adds to user personalization. Styled with Tailwind CSS and Chakra UI, the application delivers a modern, responsive design and a seamless experience across all devices.

Skill

Languages: JavaScript, TypeScript, Java, HTML, CSS

Frameworks & Libraries: React Native, React, Next, MUI, Formik, Yup, React Native, Redux, Redux Toolkit, Context API, Bootstrap, Node and Express

Additional Skills: Git, Github, Gitlab, Postman, Jira, Agile

Achievements

- Received "Diamond of the Month" for excellence in delivering high-quality projects on time.
- Gem performer award for outstanding performance.
